## LIVING CORAL

Living coral is a bright and vibrant theme, full of life and with energizing and fresh vibe.

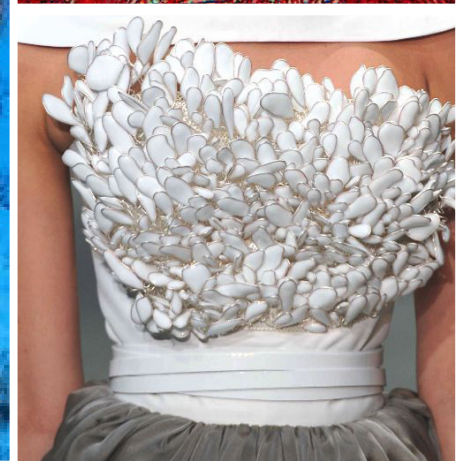

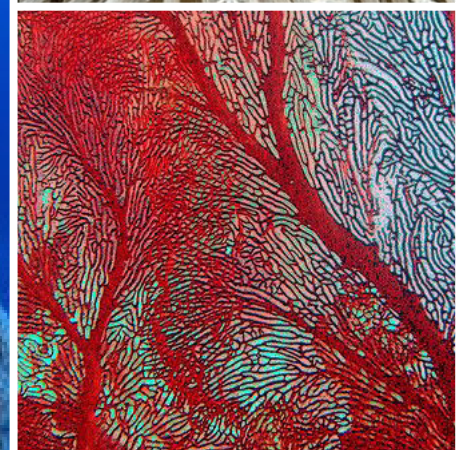

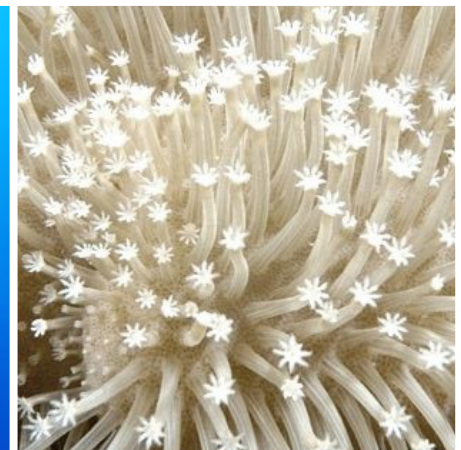

As any other bold color it can be used as the predominant color or a great contrasting accent to match other tones. This not orange, nor quiet pink shade looks good with any wood tone, white neutrals, olive greens and dusty sage. Add some aqua-blue for some high drama contrast. Living Coral presents familiar and energizing aspects of color found in nature. Inspired by the vibrant color of coral beds, this is a color that reflects nature at its most lively, magical, and tropical. Living Coral looks good in designs and patterns inspired by organic and natural forms.

## ARCTIC TRAVEL

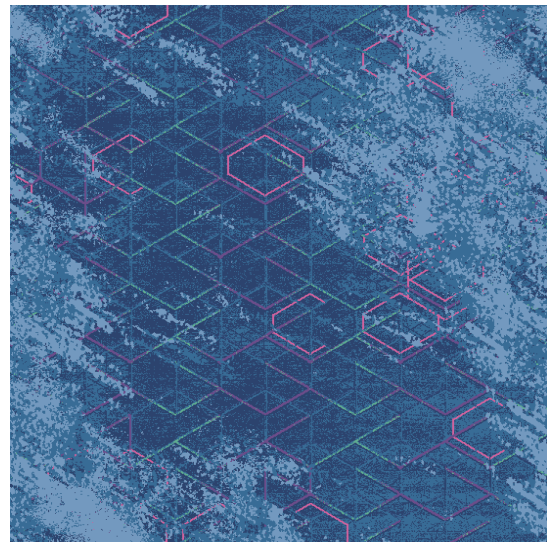

Although Arctic seems monotonous you will discover a lot of hidden gems in there! For a magical winter wonderland effect use: light, pure and breezy bay blue with a twilight blue undertone. Pair it with pinks, violets and greens of aurora borealis. Despite its sharp, geometrical and predictable form this design trend will turn your interiors into oasis of peace and calm.

## MIGRATORY BIRDS

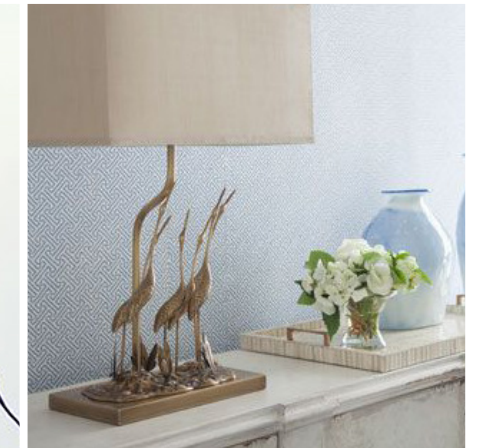

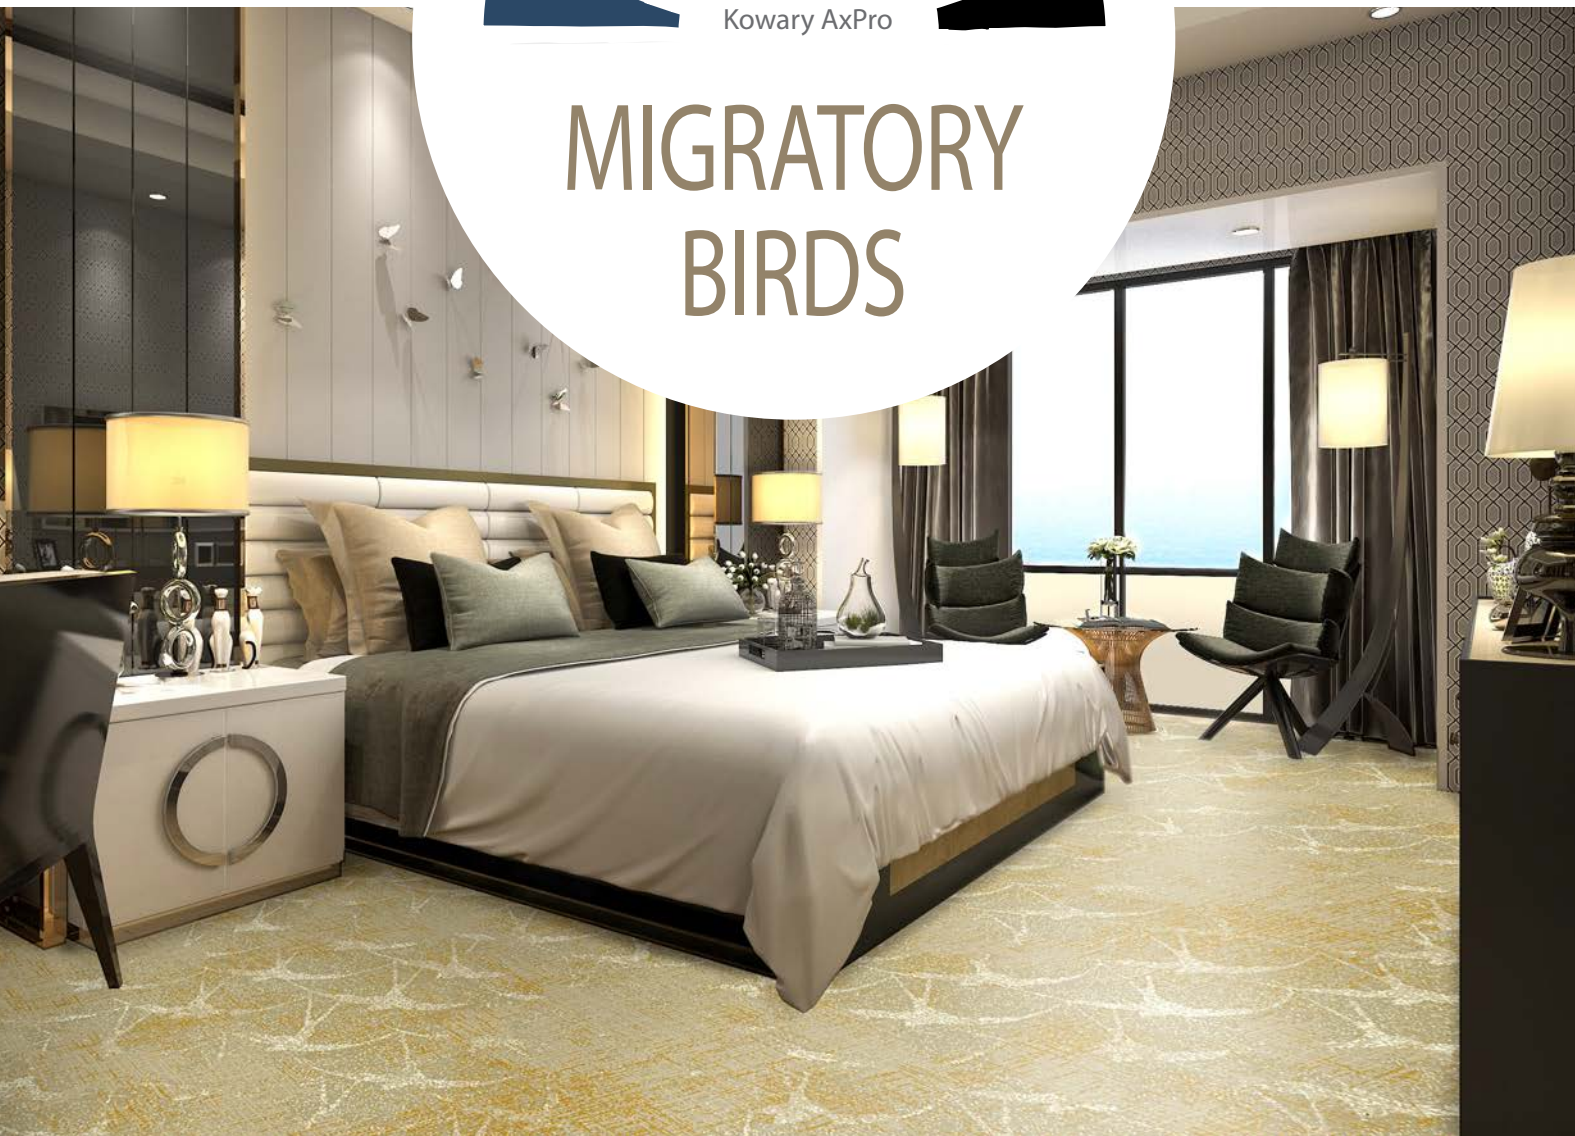

In this chapter birds migration inspired us to take a closer look at bird motifs and patterns. Bird motifs have been used in pattern designs for ages – from abstract interpretations and shapes, through simple silhouettes, to haphazard, naturalistic formations in the sky. There is a lot of grace and elegance in movements and shape of the birds. Large scale designs such as this work surprisingly well in a smaller areas. Abstracted and modern avian pieces can be subtle as well as beautiful. With our range of patterns you're sure to find designs perfect for any existing color scheme. We used soothing, calm hues with highlights of blues, beiges and creams to bring elegance and harmony into your interior.

## MURANO GLASS

There are some elements of design that are iconic symbols of refined taste and wealth. The main inspiration behind this chapter was Murano Glass – Venetian glass produced by the hands of masters for over a thousand years! Marrying the graceful nature of contemporary design with timeless magic of Murano glass and its color infusion this collection showcases the art of slow design. Often the most difficult part of interior design is what colors to use. In this case you can bring real color explosion and create playful yet refined interior. It is a great inspiration for casinos and other entertainment venues.

## TROPICAL FOREST

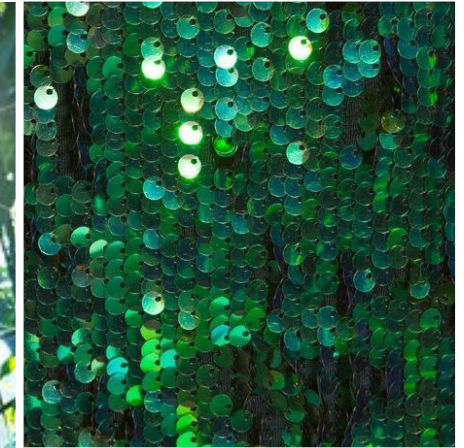

Tropical décor always provides great warmth and richness to any space. Introducing great, vivid scenes of jungle environment, charming floral prints, images of exotic animals, fluidity of light and texture into your décor can be a great way to expand your decorating horizon. The explosion of luscious greens, bright yellows and ginger reds makes the color scheme jubilant and festive yet organic. Bright turquoise enhances the greens and binds the colors together.
